### Sildenafil Citrate jelly

#### What is this medicine?

SILDENAFIL CITRATE jelly is equivalent to regular Sildenafil Citrate. This medicine is also used to treat erection problems in men. Jelly is absorbed directly into the bloodstream, as such, requires little time to achieve the same result.

#### How should I take this medicine?

The jelly is taken orally 15-25 minutes before sexual activity.

You should never take more than one dose more than once a day.

Overdosage: If you think you have taken too much of this medicine contact a poison control center or emergency room at once.

NOTE: This medicine is only for you; don't share it with others.

# What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- eye or vision problems, including a rare inherited eye disease called retinitis pigmentosa
- heart disease, angina, high or low blood pressure, a history of heart attack, or other heart problems
- · kidney disease
  - Kidiley dised.
