Ticlopidine tablet

What is this medicine?

TICLOPIDINE helps to prevent blood clots. This medicine is used to prevent strokes in patients who have already had a stroke, or those who are at high risk of having a stroke. This medicine may also be used in combination with aspirin to prevent blood clots in patients who have had a coronary stent placed.

What should my health care professional know before I take this medicine?

They need to know if you have any of the following conditions:

- anemia
- high cholesterol
- history of bleeding disorder
- kidney disease
- liver disease
- stomach ulcer
- an unusual or allergic reaction to ticlopidine, other medicines, foods, dyes, or preservatives
- pregnant or trying to get pregnant
- breast-feeding

How should I take this medicine?

Take this medicine by mouth with a glass of water. Take with food or just after eating to reduce stomach upset. Take your doses at regular intervals. Do not take your medicine more often than directed.
