Ketoconazole 2% Cream

What is this medicine?

KETOCONAZOLE is an antifungal. It is used to treat fungal infections, such as ringworm, jock itch, sun fungus and dandruff.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- an unusual or allergic reaction to ketoconazole, itraconazole, miconazole, sulfites, other foods, dyes or preservatives
- pregnant or trying to get pregnant
- breast-feeding

How should I use this medicine?

This medicine is for external use only. Wash your hands before and after use. If treating a hand or nail infection, wash hands before use only. Apply a thin layer of cream to cover the affected skin and surrounding area. You can cover the area with a sterile gauze dressing or bandage. Do not use an airtight bandage, such as a plastic covered bandage. Do not get the cream in your eyes. If you do, rinse out with plenty of cool tap water. Finish the full course prescribed by your doctor or health care professional even if you think your condition is better. Do not stop using except on the advice of your doctor or health care professional.

Talk to your pediatrician regarding the use of this medicine in children. Special care may be needed.

Overdosage: If you think you have taken too much of this medicine contact a poison control center or emergency room at once.

NOTE: This medicine is only for you. Do not share this medicine with others.
