

Estrace Vaginal

Estradiol vaginal cream placed directly into the vagina are used for "local" treatment of vaginal menopause symptoms (such as dryness, burning, and irritation). This type of vaginal estradiol has "systemic" effects, meaning that it can affect parts of the body other than where the medicine is directly applied.

Active ingredient: [Estradiol](#)

Brand(s): Evalon Cream

Estradiol vaginal cream

What is this medicine?

ESTRADIOL is an estrogen. It is mostly used as hormone replacement in menopausal women. It helps to treat hot flashes and prevent osteoporosis. It is also used to treat women with low estrogen levels or those who have had their ovaries removed.

What should I tell my health care provider before I take this medicine?

They need to know if you have or ever had any of these conditions:

- abnormal vaginal bleeding
